Do not use this device if the ambient temperature is higher.

3. Description

Features

- Made of fire-resistant nylon and aluminum alloy.
- Silent ventilation.
- Control to DMX 512 standard
- Suspension bracket
- Adjustable dimming curves
- Flicker free
- Delivered with flow break

Dimensions

4. Installation

This device can be mounted on a structure.

Structural assembly

The stand must be able to support 10x the weight of the device equipped without deformation after one hour.

Any suspended installation must be implemented by personnel qualified according to the rules of the art.

Note that implementation in certain locations may respond to specific criteria, and particular conditions, that this manual, based on a general context cannot explain.

Always make sure you know the special conditions installation of the places concerned.

DMX512 connection

Only use specific 110 Ohm cable to make the connections DMX. It is recommended not to exceed a maximum of 20 devices on a single DMX line.

Food

This device automatically adapts to voltages 110-240 V AC. There maximum load on a power line must not exceed 8 Amps.

5.Operation

Control panel

Press the Menu key until one of the parameters is displayed
following:

Menu			
1st Menu	2nd Menu	Value	Action
DMX	DMX address	0-512	DMX address setting

⚡ The display goes into standby mode after 30 seconds without operation.

⚡ When the temperature of the device exceeds the programmed protection temperature, the device automatically limits its power by 30%, until it returns to normal values.

DMX modes

1 channel mode			
Channel	Function	Value	Function
CH1	Dimmer	0-255 Dimmer	0-100%
2 channel mode			
Channel	Function	Value	Function
CH1	Dimmer	0-255 Dimmer	0-100%
CH2	DimmerFi born	0-255 5%	dimmer adjustment
3 channel mode			
Channel	Function	Value	Function
CH1	Dimmer	0-255 Dimmer	0-100%
CH2	DimmerFi born	0-255 5%	dimmer adjustment
CH3	Strobe	0-255	0-10 Strobe off, 11-255 strobe frequency (slow to fast)

6. Fuse replacement

Only use a fuse strictly equivalent to the original one if replacement is necessary.

Always disconnect the power

before any electrical intervention on the device.

7. Technical characteristics

Reference:	113776
Designation:	IRIDIUM Stage Studio Manual Zoom Fresnel
Consumption:	200W
Food:	100 - 240V AC
Frequency:	50/60Hz
LED source:	200W COB Citizen led
Lens:	150mm Fresnel
Color temperature: 3200K	
IRC:	>90
Beam angle:	12°~55°
Gradation:	16 Bit / 0-100%
DMX Channels:	1CH/2CH/3CH
Control:	STM32 control chip, DMX512 signal
Display:	4-button LCD
IP rating:	IP20

Minimum distance to illuminated object	1M
Operating temperature.:	-15°C-35°C
Dimensions:	360x270x427mm
Weight:	5.8kgs
Packaging:	1 pc/box
Packaging dimensions:	420x330x360mm
