

F34 MULTIBOX CORNER

F34MULTIBOX

The F34 truss series by Global Truss is a TÜV approved 4-point system with an external dimension of 29cm. Due to its perfect load capacity in relation to its weight and dimensions this system is one of the most commonly used. Exhibition stands and shop fittings as well as stage roofs and other outdoor applications can be built with the trusses of the F34 system. The system offers a maximum span of up to 18 meters.

The F34 truss is built with 50 x 2mm main tubes and 20 x 2mm diagonal braces of aluminium. This truss and all other Global Truss series can be powder coated in every RAL colour.

TECHNICAL DATA

General

Colour: Aluminum
Material: Al EN AW-6082 T6

Technical Data

Number of points: 4-point
Edge dimension: 29 cm
System: F34
Type: corner

Main pipe

Diameter main pipe: 50 mm
Wall thickness main pipe: 3 mm

Brace

Diameter Brace: 20 mm
