- Do not attempt to dismantle or modify the unit.
- This unit must only be operated by adults, do not allow children to play with it.

3 Product View

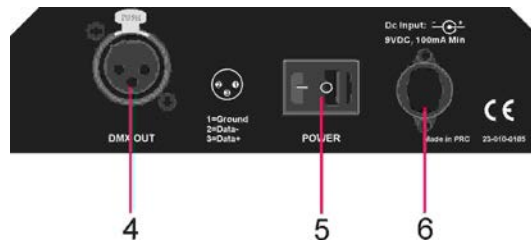

3.1 Front panel

1. Power indicator:
When the unit is powered on, this LED indicator will be lit.
2. Channel faders 1-6:
These six faders provide direct control over the corresponding dimmers, and thus the intensity for any connected luminaires.
3. Master fader:
The master fader can adjust the values of 1~6 channels, and it provides total control towards overall DMX output.

***Note:** Improvements on specifications, design and this manual are subject to change without any prior notice.

3.2 Rear panel

- 4. DMX output:
To output DMX signal via this connector.
- 5. Power switch:
To turn on or turn off the main power.
- 6. DC input:
To input main power via this port (DC9V, 100mA Min.).
